

Electrical Mast Roof Flashing

One Piece Construction for Easy, Secure Installation

The IPS Electrical Mast Roof Flashing simplifies the replacement of deteriorating flashings around electrical masts on shingle roofing. The new and improved split-boot, one piece design eliminates the guess work of cutting and sealing standard flashing and the need to unhook power lines saving you time and money.

Features:

- Constructed of UV stabilized flexible PVC with proven track record of 40 years
- Equipped with multi-piece stainless steel clamps
- Available in two sizes
- Warrantied for the life of the roof system

Tongue and groove design for increased weather protection

Constructed of UV stabilized flexible PVC

Clamps for easier installation
